# Best In Baby Nasal Relief STÉRIMAR

**The Natural Sea Water Microspray,  
recommended by doctors around the world.**

The specially designed Stérimar nozzle produces a microdiffusion effect and guarantees an optimum penetration of the active ingredients from the sea.

#### **WHEN CAN WE USE STÉRIMAR?**

Stérimar can be used when your baby is having a hard time sleeping or suckling milk due to congested or runny nose. Stérimar may induce a sneezing effect to allow mucus and impurities to be flushed out from the baby's nose. Clean and healthy nose makes breathing easier.

Stérimar is also Doctors' choice as an All-Natural preventive nasal microspray. Regular usage of Stérimar is proven to relieve the symptoms of sinuses and nose allergy problems, and hence reducing the dependence of nasal medication.

#### **ALL-NATURAL SOLUTION FOR NASAL RELIEF**

Stérimar is a preservative-free, 100% natural product of seawater, enriched with trace elements that are beneficial to our cells. Its salt concentration is equivalent to that which is naturally found in our body.

It is also contamination-free due to the technology that preserves the quality of the sea water. You may wash the detachable nozzle before or after every use.

#### **EFFECTIVE AND HANDY**

The travel-size of 50ml and 100ml allows you to keep Stérimar handy in your bag. When you are visiting a cold country or facing air pollution times, Stérimar moisturizes and cleanses your nose for better breathing.

Made in France, Stérimar is very well endorsed by Doctors around the world. It is a natural, non-medicated, non-steroidal product that is also suitable for whole family use of all ages.
